

Year	Age	Percentage (%)
1991	60-64	60.0

Figure 1 consists of 11 histograms arranged horizontally, each representing a different value of n (10, 20, 30, 40, 50, 60, 70, 80, 90, 100, 110). The x-axis for all histograms is labeled 'x' and ranges from 0 to 110. The y-axis is labeled 'count' and ranges from 0 to 100. The histograms show that as n increases, the distribution of the number of non-zero elements in the vector x becomes more spread out and shifts to the right. For $n=10$, the distribution is concentrated at low values of x (around 10). For $n=110$, the distribution is concentrated at higher values of x (around 60).

产品名称	制动器	出厂编号	Z14051624
型号规格	DZL	出厂日期	2014.5.5
委托单位	名称	沈阳蓝光驱动技术有限公司	
	地址	沈阳市浑南新区世纪路 37 号
